Read Climbing the Coconut Tree

review & detail:

To climb a coconut tree, start by tying each end of a strip of strong cloth into a loop. Then, place each foot through a loop on either side. Next, grip the trunk of the tree with your hands and place the bottoms of your feet on either side of the tree so that your knees are splayed outward.

WARNING! Do not attempt unless you're superhuman like Kap! Watch as Kap shows you how to climb a coconut tree at the Polynesian Cultural Center. Website: [www](http://www.pcc.com)
